

Your Investment Capital

There once was a man who was a widower, and moved into a retirement community to spend the rest of his life there. It wasn't long until he had made a number of friends among the other residents. There was one lady he was especially attracted to, and she was attracted to him, also. So, they spent a lot of time together.

Finally one evening he proposed, asking her to marry him. The next morning he woke up remembering his proposal, but he couldn't remember her answer. So he went to her and said, "I'm really embarrassed. I proposed to you last night but I can't remember if you said 'Yes' or 'No.'"

"Oh, thank goodness!" she replied. "I remembered saying 'Yes' but I couldn't remember who asked me."

30 seconds to save your life:

The southern town of Sderot has sustained more Gaza rocket attacks than any other Israeli community. Despite its nickname as the "kassam capital of Israel," Sderot refuses to give up on life. The town's proud residents have displayed a remarkable resilience and an embrace of everything that symbolizes life.

A disproportionate number of Israeli musicians, artists and poets hail from this small town. Local artists have even created beautiful art from old kassam rockets. In addition, Sderot has a thriving academic college and hosts an annual film festival with Israeli and foreign visitors. Sderot also hosts a large annual food and wine festival that attracts an increasing number of people.

While Israel yearns for genuine peace, few Israelis believe that it will happen any time soon. This does not mean that the country suffers from chronic depression. Quite the opposite. Israel ranks among the happiest nations in the world and among the leading countries in terms of human development index and life expectancy.

Israel's enemies do not understand its national strength. The more Israelis are threatened, the more they defiantly embrace life. This is true not only in Israel's main population centers, like Jerusalem and Tel Aviv, but also a few hundred meters from Hamas's factory of death and destruction in the Gaza Strip. Mattityahu (Matthew) 25:17-18

כְּמוֹ כֵן זֶה שֶׁקִּבֵּל שְׁתַּיִם הִרְוִיחַ שְׁתַּיִם אַחֲרוֹת
אֶד זֶה שֶׁקִּבֵּל אַחַת הִלְךְ וְחָפַר בְּאֲדָמָה וְהִטְמִין אֶת כֶּסֶף אֲדוֹנָיו

In the same way, the one with two gained two more. But the one who received one went off and dug a hole in the ground and hid his master's money.

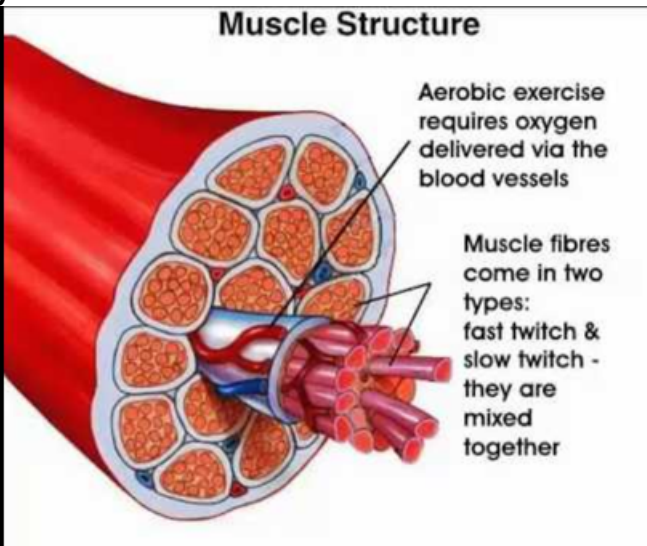

Why differing amounts of investment capital = talents.
Was that fair?

Responses to Training

- % of fast/slow twitch muscle fibres is genetically determined.
- endurance training results in type IIb being converted to type IIa.
- explains why long steady training results in loss of speed.
- endurance training increases the aerobic capacity of ST fibres.
- high intensity anaerobic training causes increase in size of FT fibres (hypertrophy), and number of FT fibres (hyperplasia).
- lack of training causes atrophy.

Eph. 2.10 CJB **We are of God's making, created in union with the Messiah Yeshua for a life of good actions already prepared by God for us to do.**

Speed reading test story.

A university did a test on students' reading abilities. The survey showed that some students could read 90 words/per minute while others could read 350 words per minute, both with retention.

They then put the students through a test to try and increase their reading levels. After 6 weeks of trying to increase people's reading abilities, the students who were reading at 90 words per minute could afterwards read 140 words per minute (a 60% increase).

The remarkable thing however is that the students who were reading 350 words per minute, ended up being able to read 2970 words per minute. The test realized the **impact of natural talent and ability on a person's ability to improve an ability.**

Importance of finding your strength and gifting ...

After extensive tests they realized that there are 600 natural talents in humanity. They then boiled that down into 34 categories/ideas.

The human brain takes 40% of all the energy created by your body. The whole literally exists to serve the brain. The brain has 100 billion cells. 15,000 connections / sec.

Each neuron may be connected to up to 10,000 other neurons, passing signals to each other via as many as 1,000 trillion synaptic connections, equivalent by some estimates to a computer with a 1 trillion bit per second processor.

The human brain 'specialises' around the ages of 35-37. Up until that point you can experiment with all sorts of things but around 35-37 the parts of our brain that aren't used as much will begin to shut down and resources reallocated to the areas of your brain that are being used. God wants us to be 'about something.'

Good but not best. CEO brought company from \$250 Million to \$500 Million – 20% of company was key. Met managers who protested. All divisions profitable but not vision.

Brains are filled with connectors. The ones that are used the most get 'fatter' than the thins ones. The difference is like that between a coffee straw and a fire hydrant hose.

When we add: skill, experience and knowledge to an existing skill/talent that we have moves it from a talent to a strength, from something we're good at to something we're excellent at.

What about difficulties?

Mattityahu (Matthew) 25:17-18

In the same way, the one with two gained two more. But the one who received one went off and dug a hole in the ground and hid his master's money.

The phrase seems to point out the earthly mindedness of the man, his worldly disposition, and his eager pursuit after the things of life; which were the reason why he disregarded his talent, and made no use of his ministerial gifts: he could not deny worldly self, nor leave all to follow Messiah; but rather than drop the world, he chose to bury his talent in it: it was his Lord's money and not his own, and he was accountable to him for it, and should have used it in another manner.

Theme of message: We need to focus on and build our strengths

Applications

1. We need to appreciate and affirm each other's particular strength mix and gifting. Affirmation is about who you are. Praise is about what you do. Affirmation needs to be accurate or it's flattery.
2. **Serve Adoni with gladness.** Come before His presence with joyful singing. **Rejoice** in the atoning death and resurrection and soon return, and **present power of Messiah.**
3. Serve from your strength. You are NOT like others.
4. Don't compare → pride or depression.
5. DON'T let discouragement take hold of you.

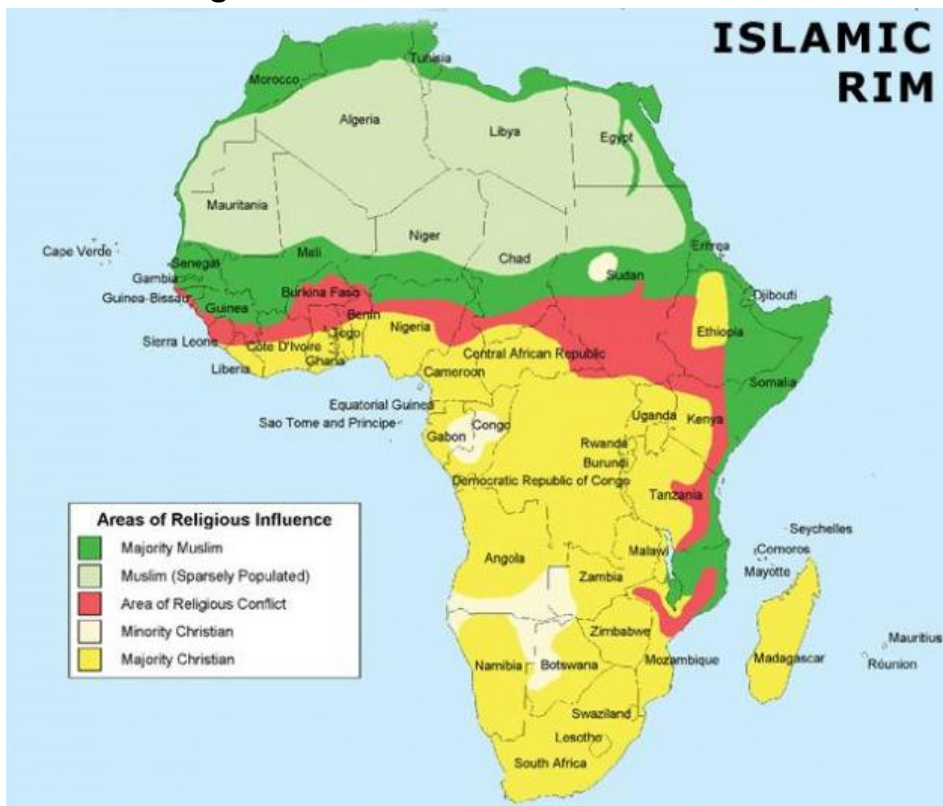

On Oct. 31, 1917, 600 soldiers of the Australian 4th and 12th Light Horse Brigade, under the command of Brigadier Genl Wm Grant, led a daring attack against the Ottoman army in Beersheva. Armed with only horses and bayonets they charged the deeply entrenched Ottoman army. As machine guns fired, and men and horses were dying, the Lighthorsemen dug in their spurs and continued to press forward to victory. The bewildered enemy failed to adjust their gun sights and their fire began passing harmlessly over the heads of the horsemen, who then quickly overran the Ottoman army utterly defeating them in less than an hour. Historians describe this remarkable battle as the **last successful cavalry charge in history.**

In Algeria, about 95 percent of the population follows Islam and less than two percent are **Christians.** The government bans conversion from Islam to Christianity, regulates non-Muslim

worship, and enforces blasphemy laws, which can be used as a cudgel against followers of Messiah.

“Believer growth has been strong in my country. Every three months we hold an immersion, sometimes for more than 100 people.”

When government officials got wind of the immersions, they reacted swiftly. “Then the government closed our own church, along with four others.
